What is
Momento LIVE?

Momento**Translate** is a tool that allows your event or meeting to be live translated by human interpreters in a very easy and cost-effective way.

Momento**Translate** can be used with your own interpreters, or we can help you find the best interpreters that fit your needs.

Live streaming in multiple languages

Our technology combines the original video with the audio directly taken from our interpretation booths.

Meetings and on-site events in multiple languages

Our tool works for many types of situations: Microsoft teams, in-site events, or virtual/hybrid events.

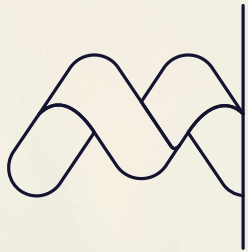

Save costs on equipment or booth installation in the venue

Save costs by having your interpreters remotely. No booths and no equipment rent are needed in the venue.

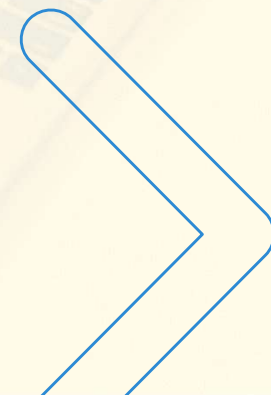

Seamless experience by your audience

Your audience will only need their phone or PC to receive, with no delay, the interpretation directly in their device.

What kind of events is
Momento**Translate** for?

Hybrid events

Have interpretation for your live audience as well as for your venue audience.

Virtual events

Streaming with different video channels, once per language for your audience to choose.

Microsoft Teams meetings

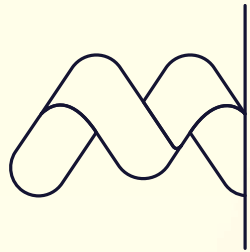

With our easy-to-install Microsoft Teams app, your organization could have translated events.

On-site events

With just a phone and headphones your audience will receive the interpretation directly on their device.

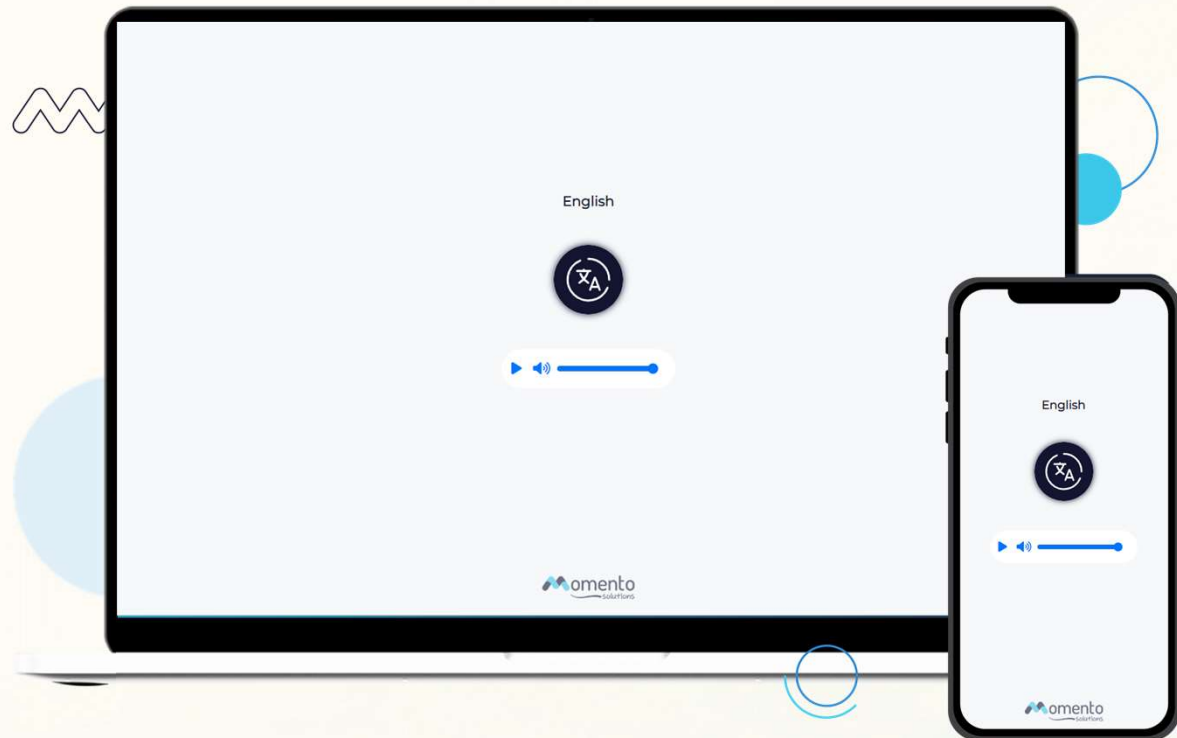

What Momento Translate can do for
your event?

Easy user experience

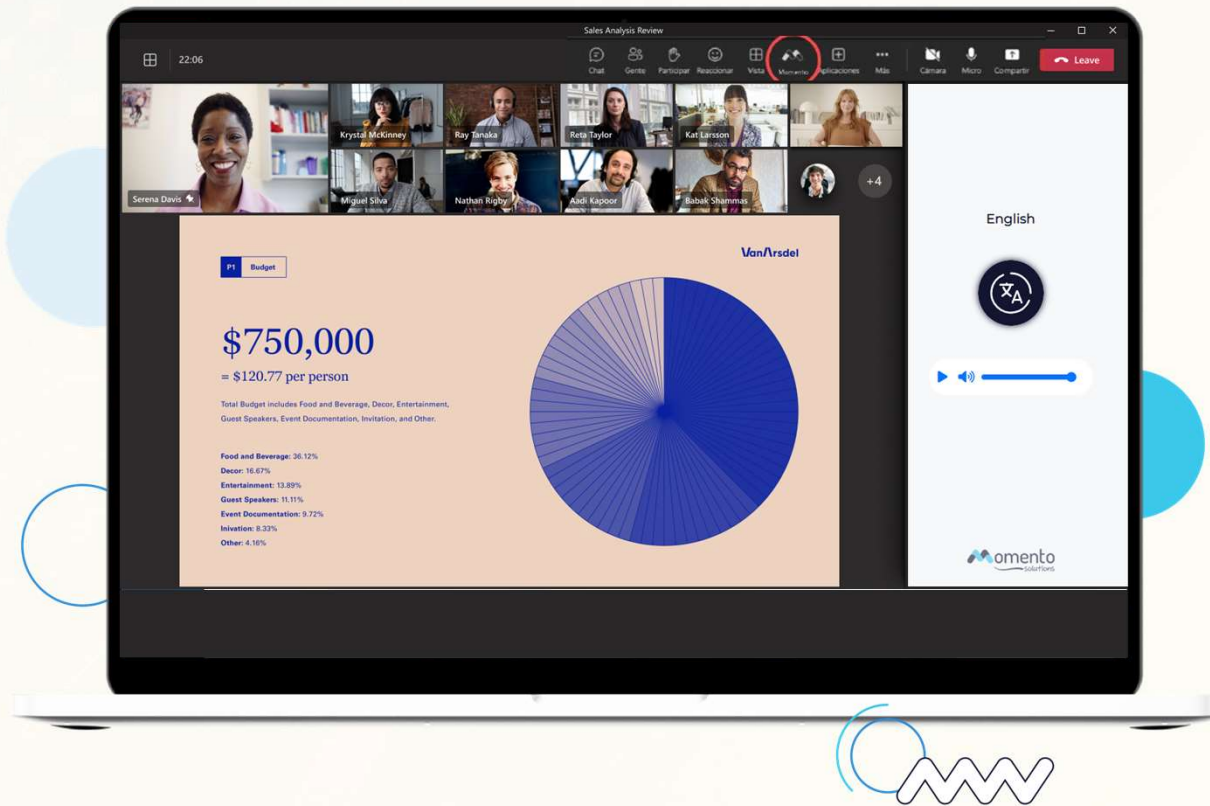

Your on-site event translated on any device

- QR code scanned by your audience and they will be listening to the interpreters.
- No extra equipment or software required.
- Remote interpreters with no software installation required.

Microsoft Teams. Momento App

Your meeting, interpreted

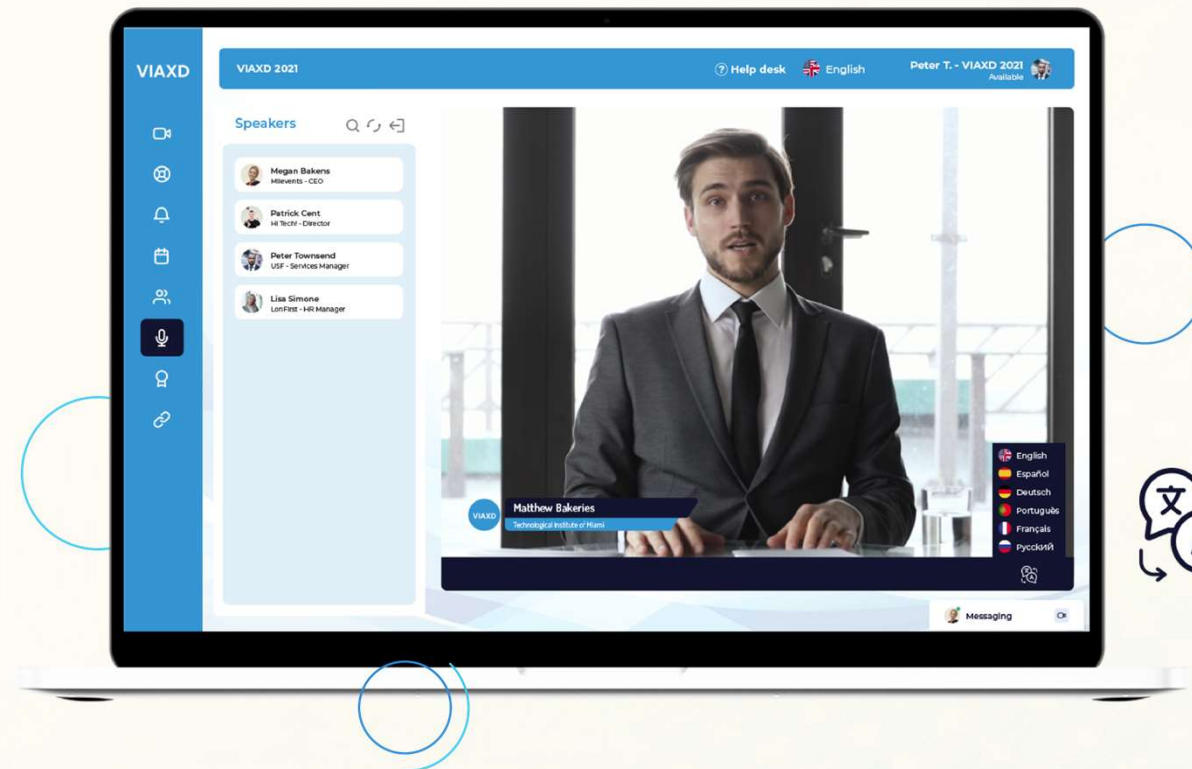

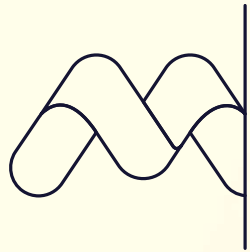

- 5 minutes setup by the Microsoft Teams admin account and your organization will be able to use it right away.
- No extra window or software required.
- Speak your language and hear the interpreter.

Streaming with simultaneous interpretation

One streaming channel per language

- Streaming with simultaneous interpretation in as many languages as needed.
- Original video mixed with the interpretation audio with no extra equipment or software.
- Remote interpreters with no software installation required.
